

Quick Start Guide for Battle Born Smart Lithium Batteries

This guide will walk you through your system setup of Battle Born Smart Lithium Batteries featuring Dragonfly IntelliGence Technology.

Download The App

- Open the App Store.
- Search for 'Battle Born Batteries' and download the Battle Born® Mobile App.

Configure Your System

Before You Start

- Ensure your system is in Bluetooth range.
- Enable Bluetooth on your device.

1. Create Account or Log In

- Open the Battle Born Mobile App.
- Go to 'My Account' to create a new account or log in to an existing one.

2. Add Your System

- On the home screen select 'Configure.'
- Select 'View Discoverable Devices' or scan the QR code on the Hub to add your Dragonfly IntelliGence Hub to your system.
- Enter your system specifications, example:
 - System Voltage: 12V
 - Battery Model: BB10012i
 - Number of Batteries: 2
- Review system preview, select 'Continue.'

3. Add Batteries

- Select 'View Discoverable Devices' or scan the QR code on the battery to add batteries to your system.

Optionally, edit battery names by selecting 'Edit Name.'

- Select 'Continue.'

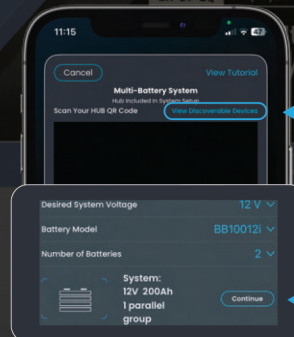

4. Configure System Layout

- Drag and drop batteries into the system configuration boxes
- Select 'Complete System Setup.'
- Name your system.

2a. Select Configure

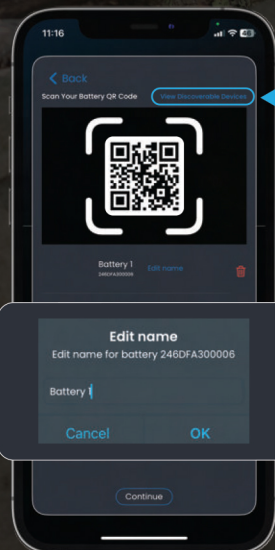

2b. View Discoverable Devices

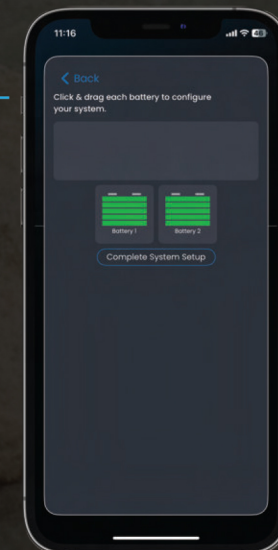

3. Add Your Batteries

Scan battery QR code or select View Discoverable Devices.

4. Configure System Layout

Drag and drop batteries onto the system grid.

Complete System!

Your system is configured!

You can now monitor your battery bank on the 'My Systems' screen.
